The Four C's

When it comes to determining a diamond's quality and value, there is a universally accepted standard known as the four C's: *cut, color, clarity and carat weight*.

CUT

The cut of a diamond determines its ultimate beauty. A diamond cut to correct proportions will give off an unrivaled radiance. Cut a diamond too shallow or too deep, and light will escape through the bottom or sides.

SHALLOW CUT
Light "leaks" through the bottom. Diamond may have dull reflection.

IDEAL CUT
As light is reflected from all sides, it comes back through the top sparkling.

DEEP CUT
Light is lost through the sides. Diamond may appear dark in the center.

COLOR

Diamonds occur in every color of the spectrum. While yellows, browns and grays are the most commonly found colors, the most desirable color is *colorless*. Truly colorless gems are extremely rare.

D E F
colorless

G H I J
near colorless

K L M
faint yellow

N O P Q R S T U V W X Y Z
light yellow

CLARITY

Clarity refers to the number of imperfections in the diamond, known as inclusions. The majority of diamonds have some degree of inclusions in them. The fewer inclusions, the more rare and valuable it is.

GIA F-IF
Flawless
Internally Flawless

VVS1 VVS2
Very Very Slight Inclusions

VS1 VS2
Very Slight Inclusions

S1 S2
Slight Inclusions

I1
Imperfect

I2
Imperfect

I3
Imperfect

CARAT

Diamonds are sold by weight in carats. Each carat is 1/5 of a gram. The heavier the diamond, the more valuable it is. But bigger doesn't necessarily mean better. Quality is found in diamonds of all sizes.

Jewelry enlarged to show detail. All photographic and printing errors are subject to correction. Gemstone purchasers should be aware all colored gemstones are enhanced unless otherwise specifically noted. Most enhancements are permanent, stable and for the most part, undetectable; however, some enhancements may become unstable or detectable at some point in the future. Quality descriptions of gemstones are subjective and could vary slightly from one expert to another. Carat t.w. means Diamond Total Weight. T.G.W. means Total Gem Weight. Prices may vary due to fluctuations in the colored gemstone, pearl, gold and diamond markets. Prices and availability are subject to change without notice.
